REFAELI MA•

PRINCIPAL PRODUCT DESIGNER · EXPERIENCE ARCHITECTURE · SYSTEMS DESIGN

> I design for the problem beneath the problem. Most products fail because they solve the wrong thing beautifully. I design systems that resolve what matters, not interfaces that mask it. Good design is invisible. It shapes behavior, until the right thing feels inevitable.

EXPERIENCE

Product Designer III CURRENT

Oct 2026 – Present

Meta (Contract) · Remote

- Design and iterate on a competitive-intelligence platform within Data Analytics Tooling and Agents, combining news, events, and product metrics into trend, insight, and threat signals that shape product strategy for leadership.
- Partner across engineering, data science, and content design on concurrent research workstreams, navigating research operations, AI, compliance, and user experience.
- Prototype and ship with AI-assisted tools, designing data visualizations that make high-quality analysis faster and more accessible across the Decision Platform.

VERIZON *Jun 2021 – Aug 2026 · Los Angeles, CA*

Principal Product Designer, Identity & Profile Architecture

Jan 2026 – Aug 2026

- Lead Verizon's cross-platform Identity and Profile Architecture initiative across Home and Mobile ecosystems, establishing a unified, AI-ready **Customer Intelligence** foundation.
- Designing scalable **Identity Systems** that integrate Behavioral Data, Demographic Attributes, Segmentation Models, Intent Signals, Roles, Permissions, and Device Relationships into a context-aware **Household Intelligence Layer**, enabling Personalization and Predictive Experiences at scale.
- Partnering with product, engineering, data, security, and AI teams to define architecture supporting **Authentication**, **Parental Controls**, and ecosystem-level Customer Orchestration across millions of touchpoints.
- Developing AI-powered **Synthetic User Frameworks** and **Persona Modeling Systems** that translate Behavioral Intelligence into faster product strategy, research validation, and design decision-making.

Principal Product Designer, Verizon Home App

Dec 2023 – Apr 2026

- Owned end-to-end product design and strategy for Verizon Home App, spanning UX, product management, and delivery; repositioned from reactive utility to **proactive AI-driven advisor**, launched Aug 2024, scaled to **1M+ customers**, **4.5 App Store / 4.4 Google Play**.
- Combined qualitative and quantitative data to identify root cause of support failure upstream of UI; redesigned onboarding architecture and system feedback model, cutting app unusable tickets from **1,600+ to under 460** per release.
- Defined cross-platform design system standards across **10+ releases**; led design QA and implementation governance, maintaining consistency and accelerating design-to-development velocity.
- Drove privacy and security experience design, defining how customers understand, control, and trust their data and device access; this work directly informed the Identity and Profile architecture that followed.
- Embedded AI into design strategy and team workflows, not as a feature set but as an operating layer for prioritization, pattern synthesis, and execution velocity.
- Led and mentored design teams; built a culture where the right question matters more than the fast answer.

Principal Product Designer, BlueJeans by Verizon

Jun 2021 – Dec 2023

- Founded and shipped a 0-to-1 enterprise-grade Design System from scratch in Figma, building **900+ responsive components** with defined component architecture, token structure, governance model, and comprehensive documentation standards; reduced design-to-development handoff time by **85%** and became the structural platform foundation for years of product delivery.
- Designed the experience architecture for an enterprise platform serving **Verizon Training, University of Michigan,** and **Wharton School**, built for global scale across **200+ languages** for medical interpretation, accessibility, and live simultaneous interpretation across **70+ languages**.
- Diagnosed preference center as a structural IA problem, not a UI problem; redesigned the underlying model leveraging qualitative research and quantitative adoption data, increasing feature adoption **12%** and reducing task time **85%**.

Founder & Creative Director

Apr 2018 – Present

13 Orphans Design Studio · Los Angeles, CA

Independent practice translating abstract, ambiguous problems into structured outcomes across material, form, and meaning. This work deepens a systems-thinking approach to product and experience design.

Lead Digital Product Designer

Dec 2020 – May 2021

iconmobile Group · Santa Monica, CA

- Led interaction architecture and scalable systems design across **BMW, Kia, Peterbilt,** and **Kenworth**, shaping global platform experience models with brand trust and cross-platform consistency at scale.
- Partnered with Kia UX leadership to define their next-generation design system; resolved consistency at the structural level, creating reusable patterns that scaled across global markets.
- Mentored designers and raised the quality bar across concept development and execution.

Lead Product Designer

Aug – Nov 2020

Prismpop · Los Angeles, CA

- Led end-to-end design at a startup founded by a former TikTok product leader, shaping a new model for social shopping via short-form video and community-driven discovery.
- Increased App Store ratings from **3.9 to 4.7**, boosted web engagement by **45%**, reduced key task time by **20%**.
- Transformed a fragmented experience into a scalable system, defining IA, core user flows, and design foundations across mobile and web.
- Designed a 0-to-1 gamification system, creator rewards currency, achievement mechanics, and progression loops, influencing the product roadmap alongside the Founder.

EARLIER EXPERIENCE

Lead UI/UX Product Designer · Unicorns & Unicorns — *2019–2020*

Senior Product Designer · Robert Half — *2019–2020*

Senior Product Designer · Phenomenon Product Design Agency — *2018*

Product Designer · Amazon (Echo – Future Vision, Student Collaboration) — *Jul–Sep 2016*

CORE SKILLS

Experience Architecture	Systems Design	Product Strategy
0→1 Product	Problem Framing & Definition	Scalable Design Systems
Information Architecture	Platform & Ecosystem Design	AI-Augmented Workflows
Human-AI Interaction Design	Cross-Functional Leadership	Design Operations
Interaction Design	Accessibility	Product Metrics & Experimentation
Front-End Feasibility	Design Systems Governance	Figma

EDUCATION

ArtCenter College of Design
B.S. Industrial & Product Design
Pasadena, CA · 2013–2018

IDA International Design Academy
Furniture Design & Manufacturing
2017

Codecademy
HTML · CSS · Software Design Principles
2020–2023

HONORS & RECOGNITION

Claude Hackathon Judge *Anthropic · Supabase · Fetch.ai, 2026*

Design Career Coach *4A's Foundation, 2023*

A' Design Award, Winner *2017 & 2022*

European Product Design Award *2017*

BYAA American Art Elite Award *2026*

Business Mentor *Institute for Entrepreneurial Leadership, 2022–23*

A' Design Award, Jury Member *2018*

Guest Speaker, ArtCenter College of Design *2016–2017*
